SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE

1. [redacted] a large submarine was seen off Cape Orlov (N 67-13, E 41-28) on a northerly course at a speed of eight to ten knots. The only detail noted was that there were guns in both the forward and after edges of the tower. 25X1
2. [redacted] eight MTBs came up the Dvina River. Four of them went into Port Ekonomiya, and the other four continued up toward Arkhangelsk. The torpedo tubes were up on deck, one on each side. 25X1
3. [redacted] The quay is of the usual type, and can take only one ship (see sketch on page 2). [redacted] It was said that one could load down to 18 feet at the quay, but a slightly greater depth was sounded about one-half meter out from the quay, where the ship had to lie because of two poles in the water at this distance from the quay. At low tide they stuck out of the water. There are two storage sheds on the quay, but no cranes. There was no electrical installation, but it was said that this could be rigged up at any time.
